DULL DAY ON THE STOCK EXCHANGE!

Consequently the Price Changes Were Insignificant.

BUYING OF UNION PACIFIC

VALUES WELL MAINTAINED AT

New York, July 15.—The stock market fell into lethargy today and only insignificant changes resulted from the day's small business. The heaty accumulation of cash revealed by the bank statement was much larger than indicated by the preliminary estimate but this was supposed to be due to recutification of last week's unexpectedly large decrease by the working out of the statement of the supposed to decrease by the working out of the purpose but this was supposed to be due to recutification by daily averages. As this builting on of the reserves is for the purpose of the work of the subscriptions for the Japanese loan had made any undue inroads upon the purpose of these current of the St. L. & W. Co. & W. Review of the Week.

a gain of 34. Oats are practically nachanged. Provisions are 5 to 15 cents higher.

Sentiment in the wheat pit throughout the greater part of the session inclined to bullishness, although no decided strength was manifested. At the opening september was up 160% to 36%, at 34% to 34%. From the start, shorts were moderate buyers, and while commission houses sold, offerings were not of large volume. One cause, improved demand was a London prediction of shortage in the Hussian crop of wheat as a result of industrial and political disorders. Later in the Large in the day this London report was practically contradicted by semi-official advices from Russia. A factor that inspired some buying was wet weather in the Canadian northwest. Weather in the United States, however, was extremely favorable for the new crop and tended to hold buyers in check. Decrease in shipments from Australia formed a bullish influence, exports for the week being 158,000 bushels against 440,000 bushels the week previous, and 272,000 the corresponding week a year ago. Movement from the winter wheat section of the United States today continued on an extremely liberal scale, causing further declines in the price of cash wheat at all grain centers. The September option here was confined within one centrange—the lowest point touched shortly after the opening, being at 83%, while the highest point was at 84%. The market closed firm with September at 84%. Primary receipts were 637,000 bushels compared with 278,000 bushels a year ago. Clearances of wheat and flour were equal to 72,000 bushels. Minneapolis, Duluth and Chicago reported receipts of 176 cars, against 149 cars last week and 223 cars a year ago. The process of digesting profits which was manifest last week in the stock market culminated early this week in a sharp break in prices coupled with the announcement of coming vacation departures of some of the according leaders of the meaning that the process of the stock of t credited leaders of the recent speculalacked the important operations on the part of skilled organized parties which had formerly been the backbone of the preceding advance, and which had been fostered in the confidence that a market would be found for holdings accumulated on the advance as a result of the reinvestment of the large sums disursed as half yearly profits on July 1. 272 Such strength as the market showed in Me the latter part of the week was taken advantage of constantly to complete the profit-taking on the part of the mar-ket followers of the leader ship, which was retiring. Evidently, the apprehension existed that the future facilities of the money market might become narrowed to the disadvantage of those using borrowed funds for speculation. The underlying feeling of confidence in conditions which establish values
